

# Almond Hulling and Processing Equipment

**Kamper Fabrication, Inc. (KFI) designs almond processing plants and manufactures equipment lines for almond shelling, hulling and finish processing. We provide complete, turn-key almond processing facilities that are reliable and easy to operate.**

KFI's almond processing plants and machinery are unmatched in durability, efficiency and longevity. Our plants withstand the rigors of high-volume processing through decades of harvests.

KFI works closely with you from start to finish. We make sure that the equipment we build for you not only meets your expectations, but exceeds your goals. This enables you

to grow your business without unplanned additional overhead costs later.

KFI has been designing, building and installing hullers/shellers and processing equipment worldwide for 25 years. Our excellent reputation comes from our commitment to customer satisfaction and consistently high-quality products. We proudly stand behind our work.

If you would like to visit one of our installations, or are interested in our products and services, contact us today!
