HULLING/SHELLING > SHEAR ROLL

The KFI Shear Roll breaks apart nut hulls and shells without damaging the kernels. Our KFI Shear Roll has a very high capacity, and is built to meet efficiency standards that satisfy even the most rigorous demands of mid- to large-scale hullers. It is self-cleaning and easily adjustable to accommodate a variety of nuts.
Design

A KFI Shear Roll breaks the hull and shell from the kernel through a shearing action. As product enters the machine, it is carried on a rubber conveyor belt underneath a rubber roller where the shells and hulls are broken apart. The belt and the roller operate at differential speeds which the operator can conveniently adjust to obtain ideal results. A high-efficiency shell aspirator removes the shells, and clean product moves to the next stage in the process. Accessible handwheels give the operator control over the differential speeds, as well as gap distance between the belt and roller. An optional vibratory feeder is available which evenly transfers product into the Shear Roll, greatly enhancing efficiency.

Full Range of Products Available!

- Auger Lines
- Box Dumpers
- Boxing Lines
- Bucket Elevators
- Catwalks
- Cleaning Decks
- Classifiers
- Conveyors
- Detwiggers
- Easylift Elevators
- Gravity Tables
- Hard Shell Crackers
- Hullers/Shellers
- Inhull Storage Tanks
- Precleaners
- Product Elevators
- Sample Crackers
- Sand Screens
- Shear Rolls
- Sizers
- Sorters
- Sorting Lines
- Stick Reels
- Support Structures
- Stainless Piping
- Transfer Hoppers
- And More!
