KAMPER FABRICATION, INC.
20107 N. Ripon Rd., PO Box 177
Ripon, CA 95366 USA

Design

The KFI Continuous Flow Batch Weigh System provides excellent operational efficiency by reducing weighing time. It incorporates a sophisticated mechanical and pneumatic handling system for dispensing nuts using precision metering equipment and scales. By use of an adjustable discharge feeder, operators can control the transfer rate, as well as adjust the system to accurately dispense metered product, whether it is in-shell nuts, clean nut kernels, or other dry commodities.

Features

Each unit is custom-designed and manufactured to fit seamlessly into your facility's existing production line. A careful evaluation of your processes, needs and facility beforehand ensures that your KFI equipment will meet current needs, as well as accommodate future production increases.

Our products are fully assembled, wired, tested and undergo a rigorous quality inspection prior to leaving the factory.

Options

- EZ-Down for gentle product handling
- Stainless steel hoppers, gates, and cylinders
- Fully enclosed for dust-free operation

Power Requirements

- 110V power
- Outside USA: 110V 50Hz

Full Range of Products Available!

Our complete line of products includes:

- Auger Lines
- Box Dumpers
- Boxing Lines
- Bucket Elevators
- Catwalks
- Cleaning Decks
- Classifiers
- Conveyors
- Detwiggers
- Easylift Elevators
- Gravity Tables
- Hard Shell Crackers
- Hullers/Shellers
- Inhull Storage Tanks
- Precleaners
- Product Elevators
- Sample Crackers
- Sand Screens
- Shear Rolls
- Sizers
- Sorters
- Sorting Lines
- Stick Reels
- Support Structures
- Stainless Piping
- Transfer Hoppers
- And More!
