

DETWIGGER

Efficiently removes small sticks, twigs and foreign material!

PRECLEANER > DETWIGGER

The KFI Detwigger removes small sticks, twigs, and other debris from harvested product. Superior engineering and a unique, vibratory cleaning screen design guarantee rapid, high-volume product flow through the initial cleaning process. The Detwigger's customizable screen design makes it a versatile machine ideal for use in a variety of post-harvest processing industries.

Design

A KFI Detwigger is a key component in a precleaner system. It rapidly and efficiently removes small sticks, twigs and other debris from harvested product. The customizable cleaning screen is engineered with a series of angled ovals that allow product to fall cleanly through.

Process Flow:

- 1 Product enters the Detwigger
- 2 Twigs and small sticks are carried away by the endless belt
- 3 Cleaned product falls through the vibratory cleaning screen
- 4 Debris exits the Detwigger
- 5 Cleaned product exits to the next stage

A counterweight exists to provide easy access for clearing occasional screen blockages while the system is running

Specifications

Belt Width	60"
Throughput	25 tons per hour
Width (Total)	7' 10"
Length	7' 10"
Height	9' 10"
Motor	2 HP

Full Range of Products Available!

Our complete line of products includes:

- Auger Lines
- Box Dumpers
- Boxing Lines
- Bucket Elevators
- Catwalks
- Cleaning Decks
- Classifiers
- Conveyors
- Detwiggers
- Easylift Elevators
- Gravity Tables
