

HARD SHELL CRACKER

Condition hard-shell varieties for efficient shell removal!

HULLING/SHELLING > HARD SHELL CRACKER

The KFI Hard Shell Cracker is ideally suited for conditioning hard-shell nuts to easily remove kernels. This product features self-cleaning rolls made of sturdy, wear-resistant, corrugated white iron. The gap between the rolls is adjustable to accommodate any size of hard-shell variety.

Design

In the KFI Hard Shell Cracker, product passes between two self-cleaning, corrugated rolls which, as they counter-rotate towards each other, compress the product just enough to place hairline cracks in the hard shells without damaging the nut meats. An accessible hand wheel on the machine lets the operator adjust the gap distance between the rolls, ensuring accurate, consistent conditioning. Our Hard Shell Cracker rolls are made of white iron, which is inherently stronger, longer lasting and more resistant to wear when compared to gray iron. Optional rubber rolls are available.
