

SAMPLE CRACKER

Quickly and efficiently generate small sample batches!

SAMPLE CRACKER

The KFI Sample Cracker takes the work out of generating shelled samples for USDA grading and crack out reports by mechanically removing nut meats from the shell. The superior engineering, ease of operation, compact size and portability of the KFI Sample Cracker make it a valuable tool for inshell processing.

Design

A KFI Sample Cracker efficiently shells product as quickly as it is fed into the machine, giving the operator complete control over the quantity to be processed. It mimics the action of our larger KFI Shear Rolls, cleanly removing the nut meat from the shell. The compact size and portability of the KFI Sample Cracker make it ideal for use in a variety of environments.
